From 52 to 55t

55t

56t and more

60t

Loading the wagon below the minimal weight norm, calculated dispatch mass is minimal weight

norm of wagon loading.

Loading the wagon above minimal weight norm of wagon loading, calculated dispatch mass is actual dispatch mass, rounded to full tons, but not less than mass of weight category, which this dispatch is in.

Calculated dispatch mass is actual dispatch mass, rounded to full tons, and 500 kg and more are rounded to full ton, and less than 500 kg are not considered.

In small dispatches, calculated dispatch mass is actual dispatch mass, rounded to full 100 kg, if dispatch mass is up to 3,300 kg inclusive. If dispatch mass is over 3,300 kg, calculated dispatch mass is actual dispatch mass, rounded to full 100 kg, but for at least 5 tons.
